Everything is good...

Very good all teachers

Our college is very beautiful

Teachers should give more attention to those students who are very poor in their subjects. There should be extra classes for them. And most specifically teachers should give us their own written (not online copy paste) notes of different questions and topics. Then after thorough reading of their suggested important questions with their own written notes we will be able to improve our marks in examination.

Every teacher should be focused all of students to clear his doubts..

It would be better to have student teacher communication which involves club like activities related to the subjects for a better understanding of concepts and to nurture one's creative side...

Our teachers always provide effective notes,
The way they teach us is excellent,
Our teachers solve our problem even individually,
We're given many important pdfs which give us knowledge on that topics, After all to write and discuss something on a topic is an important thing which is also done by us in the direction of our teachers and I think this need to be improved,

every thing is right

One suggestion from my end to the college authority to establish a smart class room for social science, example HISA.

Number of teachers in every department should be fair enough so that they can teach us properly...lack of teachers in particularly our mathematics department suffers us very much.

Complete student's syllabus not just book's syllabus

They are very helpful

Classroom is so messy every time. It needs to get clean atleast 3 times a week. So we can focus more on the study.

Improve the projector

Timing of every class may be increased a little more because everytime they are late in classes and teach only 20-25 minutes while the time of every class is 1 hour.
